

## Minerals

### Dolomite

Hard dolomite limestone is hewn in the Galilee region. Dolomite is unique in its chemical composition, being rich in magnesium. The raw material undergoes strict classification in order to obtain material of a uniform color, free of detritus. It is a hard rock which, due to its unique magnesium-rich chemical composition, is suitable for the various processing industries where its chemical composition is important.

Size (in mm)	0-0.6	0-1.4	0.6-1.4	1.4-2.5	3-6
--------------	-------	-------	---------	---------	-----

Chemical Analysis	Results %
CaO	35.5
MgO	19.9
SiO <sub>2</sub>	0.23
Al <sub>2</sub> O <sub>3</sub>	0.22
Fe <sub>2</sub> O <sub>3</sub>	0.04
*CaCO <sub>3</sub>	63.49
*MgCO <sub>3</sub>	37.99
