

Nutritional additives for livestock feed

Calcium salt

One of the nutritional ingredients of livestock food is salt. Salt is added to livestock nutritional feeds in two forms. One is limestone - more commonly known as calcium salt. And the other is pure salt.

Zmitut Co. is Israel's largest producers of calcium for the manufacturers of livestock feed, and in addition has established a unique production line for drying and mixing salt and calcium. This production line has the most advanced technological capabilities, allowing us to provide a high reliable quality product, with precision and uniformity of mixing. This we are able to give corariderate attention to the needs of our customers who can chose from among a wide range of mix rats.

Choose from among a wide range of mix ratios:

Calcium Salt %
90-10
80-20
70-30
50-50
75-25

*Other mixing ratios are available according to your requirements.
