

## Construction

### Greenish

This is a hard dolomite dark gray limestone excavated in the Lower Galilee. It is unique, having a special chemical composition.

The raw material undergoes a rigorous screening process to obtain a uniform color and exclude detritus.

It is an especially hard stone with low absorbency, which is suitable for, among other things, use in high-abrasion surfaced areas, public buildings, gas stations, shopping centers, surfaces subject to corrosion by chemical materials and more.

Properties tested according to SI 1098	Results in %	Chemical Analysis	Results in %
Crushing rate	17.1	CaO	35.5
Dust content	0.40	MgO	19.9
Absorption	1.1	SiO <sub>2</sub>	0.23
Specific gravity kg/m <sup>3</sup>	2694	Al <sub>2</sub> O <sub>3</sub>	0.22
Solidity	1.1	Fe <sub>2</sub> O <sub>3</sub>	0.04
		*CaCO <sub>3</sub>	63.49
		*MgCO <sub>3</sub>	37.99
