

## Construction

### Perlato

A compact macro crystalline limestone imported from Italy, Perlato is cream to off-white in color, a unique color that is uncommon in Israel.

The raw material undergoes a strict selection process in order to obtain a uniform color without foreign substances. A particularly hard stone with low absorption, it is appropriate for, among other things, the paving industry, granulite coating of surfaces and walls, floor coverings, colored asphalt and more.

<b>Size (in mm)</b>	32-45	22-32	6-19
---------------------	-------	-------	------

Properties tested according to SI 1098	Results in %	Chemical Analysis	Results in %
Crushing rate	27.7	SiO <sub>2</sub>	0.1%
Absorption	0.4	MgCO <sub>3</sub>	2.0%
Specific gravity kg/m <sup>3</sup>	2673	CaCO <sub>3</sub>	97.8%
Solidity	0.7	Al <sub>2</sub> O <sub>3</sub> +Fe <sub>2</sub> O <sub>3</sub>	0.3%
